WIFI Internet

For Service/Support Call: Access Unlimited at 616-225-9915 Mon-Sat 8:00 am-10:00 pm

CABLE TELEVISION SERVICE

To ensure prompt service, any and all inquiries regarding the Cable TV service should be directed to Private Cable Systems of MI by calling 1-800-500-8876.

Private Cable Systems is responsible for all service and repairs up to the cable jack located at the pedestal at the end of each dock. The boat owner is responsible from the pedestal into the boat.

Many things can cause poor reception. If you are experiencing reception issues please check the following items before calling for service.

1. Bad or damaged cables. (RG-6 cable should be used) connectors, (Twist on connectors and push on connectors are not advised) bad or wrong splitters or splices. (Using no or not larger than one 2-way splitters is best).
2. Excessive long coiled up cables.
3. DVD or VCR is on.
4. Amplifiers on boat. Cable will not work well running thru an on-board amplifier.
5. A/B switch on the boat may be in "OFF AIR" mode rather than "Cable".
6. Flat screen TVs need to be in Cable mode and auto programmed. This is not a High Def signal. You may need to select another input from the remote or front of TV.

Service calls beyond the pedestal to the boat will result in a minimum \$79.00 service charge if not the fault of the cable system.
